

# Configuring Joker.com Mailboxes with Mail Clients

To use your Joker.com mailbox with popular email clients, you have two options: **automatic provisioning** - use the provided files for easy configuration, and **manual setup** - enter the required settings yourself.

Joker email service parameters:

<b>Username and password</b>	same as your login at <a href="https://web.joker.email">https://web.joker.email</a>
<b>IMAP</b>	imap.joker.email
<b>Port</b>	143 (TLS: 993)
<b>Security:</b>	'Password', STARTTLS (or TLS for port 993)
<b>SMTP</b>	smtp.joker.email
<b>Port</b>	587
<b>Security:</b>	'Password', STARTTLS
<b>POP3</b>	pop3.joker.email
<b>Port</b>	110 (TLS: 995)
<b>Security:</b>	'Password' (or TLS for port 993)

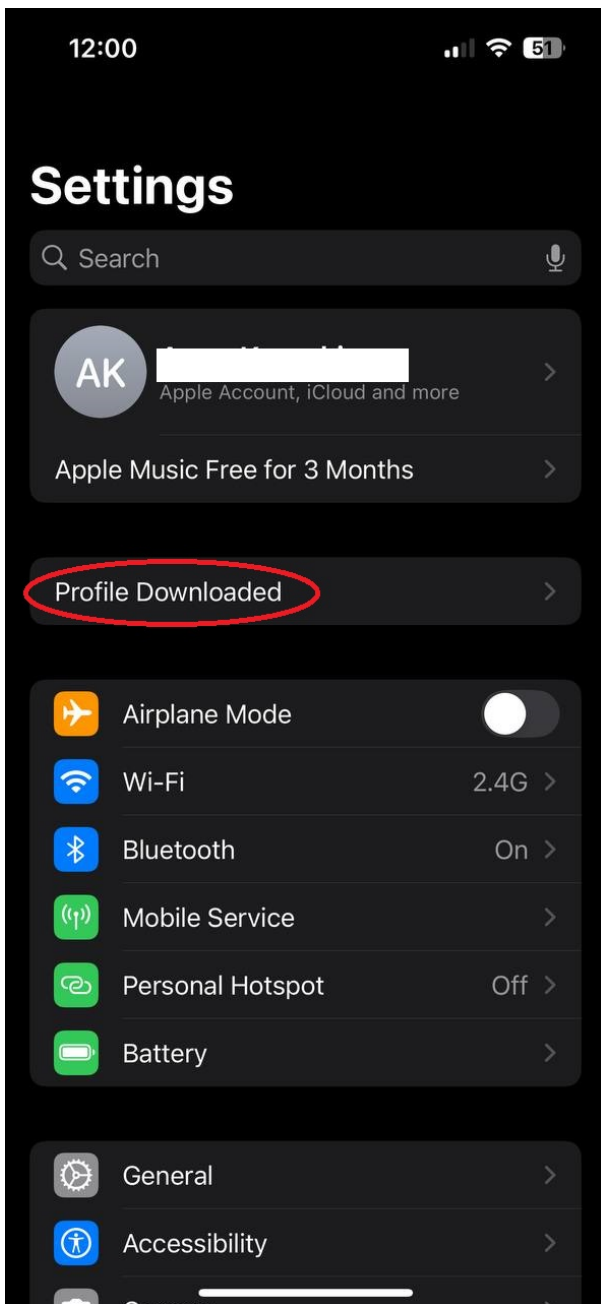

Below, you'll find examples of how to set up your mailbox with popular email clients.

<b>Thunderbird</b>	Use the <b>automatic account setup in Thunderbird</b> , or set up the provisioning manually as described above.
<b>IOS</b>	<p>Download provisioning profile under "Mailclient Provisioning" section as shown on the screenshot below:</p> <p><b>Apple (IOS, OSX)</b></p> <p><a href="#">Download provisioning (auto configuration) profile for iOS / OSX</a></p> <p>Or set up the provisioning manually as described above. Below, you will find step-by-step instructions on how to set up your Joker.com mailbox on IOS device.</p>

<b>Android</b>	Set up the provisioning manually using the parameters specified above, in case the automatic configuration does not succeed.
<b>Windows</b>	Set up the provisioning manually using the parameters specified above.

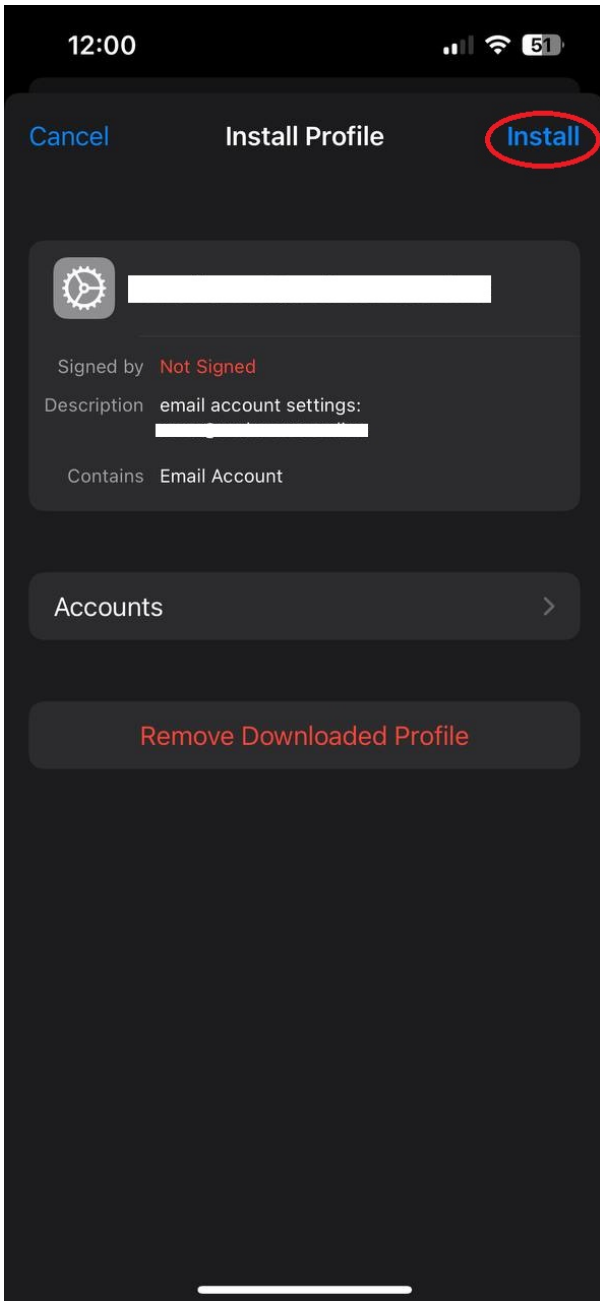

## Setting up your Joker.com Mailbox on IOS device (iPhone, iPad, etc.)

1. Login to <https://web.joker.email> **using your IOS device** (iPhone, iPad, Mac)
2. Visit 'Settings' -> 'Mailclient provisioning', and click on the 'provisioning profile' link. You will get the prompt "Profile loaded".
3. Go to the **iPhone/iPad settings**, under your account name, you will see the downloaded profile; click on it:

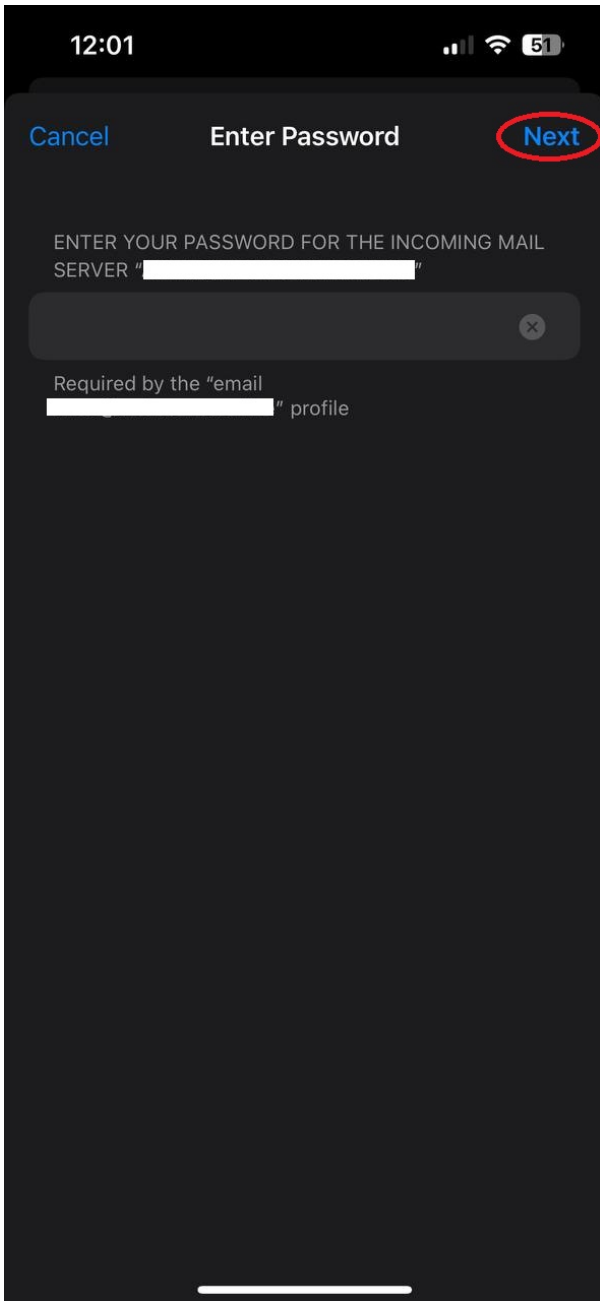

#### 4. Click "Install":

The "Not signed" warnings can be safely ignored.

5. Enter your password and click "next". It may take a minute for the profile to install.

After this, you will find the new mailbox account listed in your "'Mail' app.
