

Joker.com: New Billing Options in Reseller's Profile

Additional Email Option for Monthly Invoices

We're introducing a new invoicing enhancement for Resellers:

Note: Please find user-related settings in your [user profile](#)

The screenshot shows the 'RESELLER OPERATIONS' tab in a user profile. It features a section titled 'Please provide us with email addresses for the purposes shown'. There are two input fields for 'Admin E-mail' and 'Robot E-mail'. To the right, there are fields for 'Alerts/Priority Notices' (containing 'alerts@mycompany.com') and 'Send Invoices to' (containing 'billing@mycompany.com'). A toggle switch labeled 'Send invoices to this address only' is currently turned off. Below this is a text area for 'Add text to invoice' with a placeholder 'e.g. attention: department domains'. Two red circles highlight the 'Send Invoices to' and 'Add text to invoice' fields.

You can now:

- Add **an additional** email address to receive monthly invoices
- Choose how this email is used:
 - As the **exclusive recipient** (replacing the primary alerts email), or
 - As an **additional recipient** (receiving invoices alongside the primary address)

In addition, a new optional field is now available:

- Add custom invoice text, which will be automatically included on your invoices when provided

This update offers greater flexibility for accounting processes and internal invoice handling.
