

Setting up Your Joker.com Account

First Steps

To be able to register and manage your domains, the first thing you need is to create a user account at joker.com.

This can be done in a few easy steps:

1. Click on "Register" at the top right corner:

2. Fill out the form, and click the "Register" button:

 **User Registration**

Not registered yet? You can create your Joker.com account instantly here.

Login name

 JohnDoe365

6 characters at minimum, allowed characters are A-Z, 0-9 and _-@ and login name must not begin with a number.

Your name (Contact name)

 John Doe

Your password

 •••••••• 

8 characters at minimum and do not use spaces.

Re-type your password

 •••••••• 

Email

 johndoe@email.com

Re-type email

 johndoe@email.com 

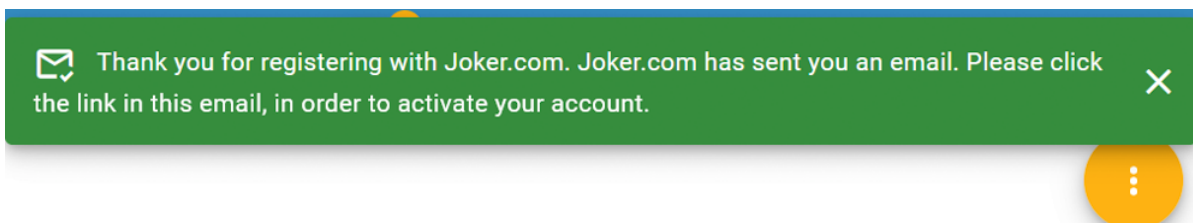

☒ I want to subscribe to the Joker.com email newsletter for news and special offers.

Please note:

- A valid and functional **Email address** is needed, because it will be used to send notifications and status information about all your transactions. To activate the access, Joker.com will send a confirmation link to this address.
- After registration, you have the option to enable [Two Factor Authentication](#) .
This will enhance the security of your login to Joker.com significantly. You will find this option after login in "My Joker → Profile".

3. After successful registration, you will see the notification in the top right corner:

4. Last step is activating your account, by clicking on the link in the verification email:

2023-05-04 10:24:35

Welcome to Joker.com!

Thank you very much for registering with Joker.com, your domain registrar since 1997!

Please confirm your registration with Joker.com by clicking on the button or the link below. Your account will be instantly activated, ready to register domains from more than 400 endings.

[Please Confirm Registration!](#)

That's it! Your account is ready and you can start ordering and managing your domains.
