

Webmail Client: Usage and Plugin Overview

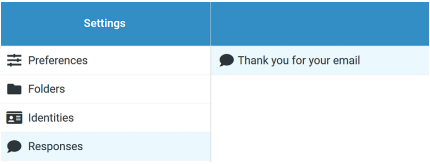

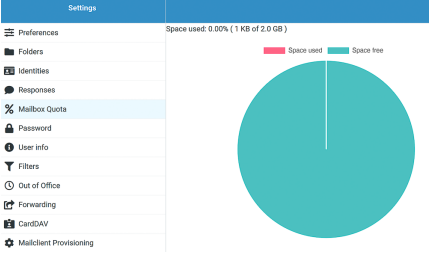

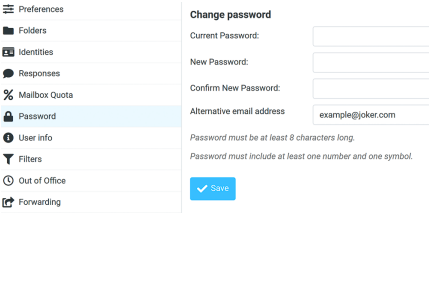

Main Functions

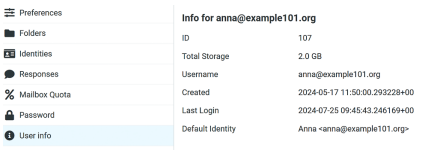

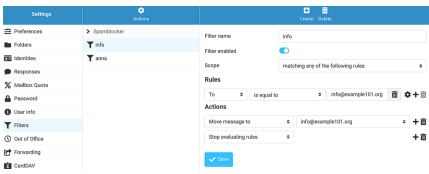

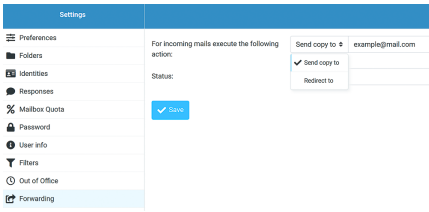

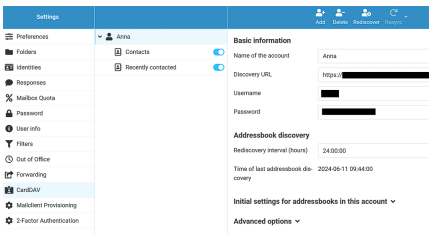

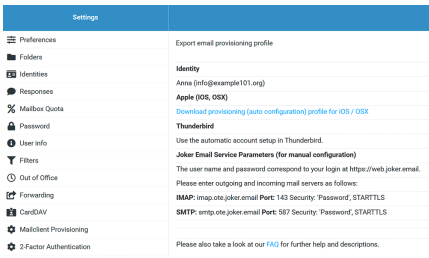

Our Joker.com webmail client is based on Roundcube Webmail, below you will find the original documentation and how-tos:

- [User Guide in English](#)
- [User Guide in German](#)

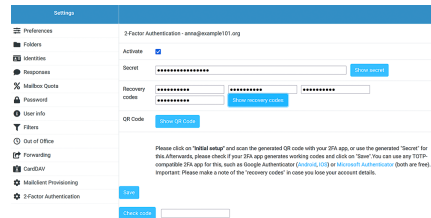

Important: to access your newly created mailbox, you **have to set a password for it** using the mailbox configurator at Joker.com. The instructions can be found [here](#).

Plugin Overview

| | | |
|----------------------|--|--|
| Responses |  | Allows to save pre-written frequently used responses. |
| Mailbox Quota |  | A quick overview of free and used space according to your subscription plan . |
| Password |  | Allows you to change the password for your mailbox and add an alternative email address. An alternative email address is essential for recovering access to your mailbox. To ensure you can always regain access quickly and securely, we highly recommend providing one if possible. |
