RPanel.io: Reseller Profile, Orders & DMAPI Key Management

Latest Frontend Additions to our Reseller Portal RPanel.io

Reseller Profile Management Made Easy

Managing your **Reseller Profile** is now more convenient than ever! With our latest update, you can **edit and update your reseller information** effortlessly in **rpanel.io**:

2025-02-1.png

How can you use it? For example:

- Customize your **WHOIS signature**
- Set up **white label for notification emails**
- Define your **landing page for authorization forms**

Take full control of your reseller identity and branding - all in one place. Log in to **rpanel.io** and explore the new feature today!

Smarter Order Management and Export

We’re excited to introduce a new addition to our Reseller's portal, **rpanel.io** that makes managing your orders easier than ever! You can find it under **Orders** in the user menu:

2025-02-3.png

With this latest update, you can now view your orders **- both paid and payment-free transactions for the last three months** - at a glance. Effortlessly filter them any way you like

and **download them as a CSV file** for seamless record-keeping and analysis:

This enhancement gives you **more control, better visibility, and improved efficiency** in handling transactions. Whether you're tracking payments or organizing order details, rPanel.io now works even harder for you!

DMAPI Key Management

Managing your **DMAPI keys** just got a whole lot easier! You can access the API keys management section over the user menu:
