

# 1.8 Renewals

## How to renew a domain?

### Renew a Domain

Renewing a domain means, adding years to the lifetime of a domain.

You can usually choose to add **from 1 to 10 years**, which depends on the type of domain (TLD).

The lifetime will be **added** to the expiration date, i.e. if you renew before the expiration date, you will not lose the remaining term.

Other options like "Domain Privacy" can also be maintained in the [renewal section](#) on Joker.com.

In order to renew a domain, please visit Joker.com '[Renew a Domain](#)'.
