

1.8 Renewals

Who is able to renew the domain?

Domains can be renewed by the owner of a domain (the individual who registered the domain), using the regular renewal procedure. [Notifications](#) will be sent by email.

In case there are roles assigned to this domain, the 'Admin' and/or the 'Billing' role are also enabled to renew a domain.

Please find out more about 'roles' [here](#).

In case no authorized person is available, the '[Simple Renewal](#)' procedure can also be used.

This allows anyone to renew a domain, but without being able to change any other aspect of the domain.

Unique solution ID: #1090
