

1.9 Nameservice

How do I configure the Joker.com name servers (adding entries)?

Joker.com Name Service - adding Records

To add [DNS records, URL- and Email forwards](#), you have to log into Joker.com and visit '[My Domains](#)' in menu '**Domains**'. Please click on "**DNS**" at the domain you want to add records to.

Please chose your desired [type of record](#) - click on "+ **New**", and select your type.

A detailed help is available within the form for each of the selected record type. Click on "?" for this.

Please do not forget to press "**Save changes**" after you have done all your edits.

Unique solution ID: #1104
