

1.9 Nameservice

How do I use name service (DNS) or URL forwarding at Joker.com?

Joker.com Name Service

To add DNS records to your domain, or add **email- and URL forwarding**, please visit "[My Domains](#)", and choose "**DNS**" at the respective domain. There you will also find the [Dynamic DNS \(DynDNS\)](#) options, and the option to enable [DNSSEC Support](#).

In case the "DNS" function is not accessible, the reason for this is one of these:

- your domain does not use the free "**Joker.com Name Service**". This is required to make use of the Joker.com DNS editor. Please check your domain in '[My Domains](#)' -> '[Modify](#)', what name service is chosen for your domain. You can change this there as well.
- your domain is in status "hold" - this means, it is currently not operational. Common reasons for this are "domain is expired", or "domain is under a dispute".

Switching to Joker.com Name Service is easy (and free): Visit "[My Domains](#)", and choose "**Modify**".

In section "**Name servers**", click on the edit icon  , and choose 'switch to Joker.com name service'.

Please find some more detail here: [How to create a name server\(-record\)?](#)
