

Basics

Commonalities for all requests

DMAPI-Server URL

This is the service address which has to be used for all requests:

`https://dmapi.joker.com`

This is how a request looks like:

`https://dmapi.joker.com/request/<name-of-request>?<name-of-parameter-1>=<value-of-parameter-1>`

`&<name-of-parameter-2>=<value-of-parameter-2>&auth-sid=<your-session-id>`

Header fields which are returned by most requests

	Unique
	0 if no error occurred,
	Human
Result	ACK or NACK (= "Ack
Error	May be

Basics

Proc-Id	
HTTP error codes	200 if e

IMPORTANT: Every request (except "login") **requires** the presence of the **Auth-Sid** variable ("**Session ID**"), which is returned by the "login" request ([login](#)). An active session will expire after some inactivity period (default: 1 hour).

In case you are using a browser to access this service, the session id will be set as a cookie, hence need not to be specified as Auth-Sid (unless cookies are not supported or turned off). In any case, Auth-Sid has precedence, if provided.

Requests consist of these parts:

- **"Requires"**: Defines variables (sometimes referred to as 'fields') that **MUST** be present
- **"Accepts"**: Defines variables that **MAY** be present (but not required)
- **"Returns"**: Describes the request's output - header fields and extra data (if any). If "Returns" is omitted, then a standard reply should be expected (Status-Code, Status-Text, Proc-ID etc)
