

Domains

domain-lock

Requires (mandatory)

<i>domain</i>	domain name to lock
---------------	---------------------

With this request you can **lock a domain** to **prevent from fraudulent transfer attempts**.

If a domain is locked, each transfer-request from a foreign registrar will be declined.

Example:

`https://dmapi.joker.com/request/domain-lock?domain=example.com&auth-sid=<your-current-session-id>`

Unique solution ID: #1028

Author: Joker.com
