

# Domains

## domain-set-property

### Requires

domain	domain name or pattern
pname	property name
pvalue	property value (may be empty)

With this request you can set a property (flag) for a domain or a set of domains, selected by wildcard pattern.

List of available properties and their effects:

autorenew	0 or 1	If set to 1, the domain will be automatically renewed at expiration (if you have enough funds in your account)
whois-opt-out	0 or 1	currently only used for .tel domains; if set to 1, whois information will not be shown in whois
privacy		off or basic or pro (if available)

If value provided is empty, then the property will be cleared, i.e. the default will be used.

### Example:

```
https://dmapi.joker.com/request/domain-set-property?domain=example.com&pname=autorenew&pvalue=1&auth-sid=<your-current-session-id>
```
