

1.2 Login Account

How could I change my email address?

Change of Email address

If you are logged in, you can **change your email address** by visiting ['My Joker' => "My Profile"](#).

There you will find the "change email" form.

This procedure will send a **verification link** to the new email address. The old address remains active until this **verification link** has been clicked.

Please also consider the activation of our [Two-factor-authentication](#), which provides a high level of security for your account.

Unique solution ID: #1051
