

# 1.15 What is...

## What is 'Email Forwarding'?

### Email Forwarding

This is a service provided by Joker.com, that allows you to **create email addresses for a domain**, and to forward incoming emails for those addresses to an **existing external mail account**.

This means: You could have

- info@yourdomain.com
- john@yourdomain.com
- \*@yourdomain.com
- ...

being forwarded to your email account at your ISP or email provider like Gmail, Yahoo or others.

#### Please be aware that:

- email forwarding - like URL forwarding - presumes, that the domain in question uses free **'Joker.com nameservice'** (which is the default; see also [How to configure nameservers?](#), [How do I change my nameservers?](#))  
Domains with third-party nameservice cannot use Joker.com email forwarding.  
Switching to 'Joker nameservice' can be easily done in ['My Domains'](#) choosing **'Modify'** with the domain you want to change.
- in ['My Domains'](#), visit **'DNS'** to **add or modify email addresses** for your domains
- activating 'email forwarding' will automatically delete current **'MX' records**. This is due to technical reasons and cannot be avoided, so you could either let Joker.com handle your email or a third-party mailserver.
- It is also possible to create **'catch all'-addresses**: If you enter '\*' instead of 'your\_name' as 'Email Address', all emails **not matching any other address you created** will go to the '\*' entry.
- Additionally, a special account 'postmaster' does exist, which can be modified, but not deleted.
- You also find an option to "block" certain addresses, which, when activated, will delete all incoming emails to this address.

## 1.15 What is...

For the number of email addresses per domain, **we do not police strict limits**. Instead, we apply a **fair-use policy**.

As long as we do not observe significant system impacts by either excessive amounts of emails sent or addresses created, there will be **no restrictions**.

'Excessive' here means significantly above average, and "system impact" means significant interference of the general system and/or other users.

Current limits are:

- 25MB as max. size of a single mail
- 400 emails per day per address

**Important: A newly created email address (or a changed target address) has to be activated by answering the 'activation email' being sent to the 'Target Email-Address' (click on the link within this email).**
