

Domains

List domains

Introduction

for domains

With this request you can get a list (lexicographically sorted) of all the domains, you have currently registered at joker.com.
You have to provide the target registry within the request:

com = .com/inf

com = .inf

inf = .inf

org = .org

inf = .inf

inf = .inf

inf = .inf

inf = .inf

inf = .inf

inf = .inf

inf = .inf

inf = .inf

LIMITATIONS

- Only 20.000 domains are listed. If you have more than 20.000 domains under 1 registry at joker.com, you have to track the domain names yourself.
- In case you have more than 20.000 domains at joker.com under 1 registry, this request will not work for you. The listing would be incomplete and it will be missing random domains.
- This request works only with the new joker.com system.

Request fields

mailto:subject for domains [your reference id]

Definition of the request:

Request field	Request value	Response
subject	mailto:subject for domains [your reference id]	inf

LIST DOMAINS
