

# Domains

## List domains

### Introduction

### for domains

With this request you can get a list (lexicographically sorted) of all the domains, you have currently registered at joker.com.  
You have to provide the target registry within the request:

cto = com/ct

com = .com

net = .net

org = .org

info = .info

biz = .biz

mob = .mob

name = .name

de = .de

cn = .cn

ru = .ru

uk = .uk

### LIMITATIONS

- Only 20,000 domains are listed. If you have more than 20,000 domains under 1 registry at joker.com, you have to track the domain names yourself.
- In case you have more than 20,000 domains at joker.com under 1 registry, this request will not work for you. The listing would be incomplete and it will be missing random domains.
- This request works only with the new joker.com system.

### Request fields

mailto:subject: list domains [your reference id]

Definition of the request:

Request field	List domains	Response
subject	target.com	com

### LIST DOMAINS

**Example 1:** list domains for .com-domains

subject: list domains [your reference id]
