

1.5 Change of Registrar = Transfer of a Domain

How can I make sure that the current registrar will allow the transfer of my domain?

Assisting a Transfer

Please check the documentation or FAQ of **your current registrar** regarding "Lock/Unlock", "Transfer", "AUTH-ID" or "domain password".

Some registrars send emails to their customers and ask for confirmation for the transfer to [Joker.com](https://joker.com). Unfortunately, some of these emails may look like SPAM.

Make sure to read them completely and to answer according to the rules of the registrar in charge. Other registrars allow outgoing transfers only if the customer has opened a "transfer time window" **before** the registrar receives a transfer request from the registry.

In any case, for each domain that is to be transferred the [AUTH-ID](#) is needed, and each domain **must not** have the status "transfer lock". Additionally, the domain must exist for at least 60 days.

Please feel free to [contact us](#) if you need help!
