

Contacts

Create a contact

Introduction

create <id>-<id>

Valid values for <id>

- com
- net
- org
- info
- biz
- mobi
- name
- us
- dk
- cn
- au

With this request you can create person contacts. You can create 1 contact with one request.

ATTENTION:

You will find the request field "individual" within the request definition. If you set it to "1", you have to provide the request fields "name" and "name". If you set it to "0", you have to provide information in the request field "organization".

As the whole for .com shows a field called person, the rules for generating this field are the following:
If you provide the field "name", the whole is allowing always the values of this field, regardless of "name" and "name".

If you only provide the field "name" and the field "name", we will generate the field "name" as the result of the concatenation of "name" + " " + "name".

The result of "create_contacts" is a reference which is following the format:

- <CCOM>-<number> e.g. CCOM-176289 for a .com domain.
- <CNET>-<number> e.g. CNET-176289 for a .net domain.
- <CORG>-<number> e.g. CORG-176289 for a .org domain.
- <Cinfo>-<number> e.g. C176289-LRMS for a .info domain.
- <CNETU>-<number> e.g. CNETU-176289 for a .biz domain.
- <COMO>-<number> e.g. COMO-176289 for a .mobi domain.
- <CNAM>-<number> e.g. CNAM-176289 for a .name domain.
- <COUS>-<number> e.g. COUS-176289 for a .us domain.
- <CODE>-<number> e.g. CODE-176289 for a .dk domain.
- <COON>-<number> e.g. COON-176289 for a .cn domain.
- <Cnumber> e.g. C176289 for a .au domain.

Request fields

Individual: create <id>-<contact> [your reference id]
Definition of this request

Contacts

ATTENTION

According to the rules of DENIC, you have to provide a full number for the admin-c and the tech-c of a .de domain.

CREATE COM CONTACT

Example 1: create com-contact (name will be generated from frame and frame)

subject: create com-contact [your reference id]

email:gon@com.net
 individual:Y
 frame:gon
 name:gon
 address:Transferstreet
 address-2:App. 1
 postal-code:4711
 city:mon
 country:DE
 phone:44 1234567890

Example 2: create com-contact (name and frame will be ignored)

subject: create com-contact [your reference id]

email:gon@com.net
 individual:Y
 frame:gon
 name:gon
 name-2:Gordon Name
 address:Transferstreet
 address-2:App. 1
 postal-code:4711
 city:mon
 country:DE
 phone:44 1234567890

CREATE NET CONTACT

Example 1: create net-contact (name will be generated from frame and frame)

subject: create net-contact [your reference id]

email:gon@com.net
 individual:Y
 frame:gon
 name:gon
 name-2:Gordon Name
 address:Transferstreet
 address-2:App. 1
 postal-code:4711
 city:mon
 country:DE
 phone:44 1234567890

Example 2: create net-contact (name and frame will be ignored)

subject: create net-contact [your reference id]

email:gon@com.net
 individual:Y
 frame:gon
 name:gon
 name-2:Gordon Name
 address:Transferstreet
 address-2:App. 1
 postal-code:4711
 city:mon
 country:DE
 phone:44 1234567890

CREATE ORG CONTACT

Example 1: create org-contact (name will be generated from frame and frame)

subject: create org-contact [your reference id]

email:gon@com.org
 individual:Y
 name:gon
 name-2:Gordon Name
 address:Transferstreet
 address-2:App. 1
 postal-code:4711
 city:mon
 country:DE
 phone:44 1234567890

Example 2: create org-contact (name and frame will be ignored)

Contacts

subject: create info-contact [your reference id]

email:gonzo@noaa.info
individual:Y
frame:gonzo
name:gonzo
name.Mr: Gonzo Name
address:1 Transfer Place
address-2:App. 1
postal-code:4711
city:Wing
country:DE
phone:44 1383794 50640

CREATE INFO CONTACT

Example 1: create info-contact (frame will be generated from frame and frame)

subject: create info-contact [your reference id]

email:gonzo@noaa.info
individual:Y
frame:gonzo
name:gonzo
name.Mr: Gonzo Name
address:1 Transfer Place
address-2:App. 1
postal-code:4711
city:Wing
country:DE
phone:44 1383794 50640

Example 2: create info-contact (frame and frame will be ignored)

subject: create info-contact [your reference id]

email:gonzo@noaa.info
individual:Y
frame:gonzo
name:gonzo
name.Mr: Gonzo Name
address:1 Transfer Place
address-2:App. 1
postal-code:4711
city:Wing
country:DE
phone:44 1383794 50640

CREATE BUS CONTACT

Example 1: create bus-contact (frame will be generated from frame and frame)

subject: create bus-contact [your reference id]

email:gonzo@noaa.biz
individual:Y
frame:gonzo
name:gonzo
name.Mr: Gonzo Name
address:1 Transfer Place
address-2:App. 1
postal-code:4711
city:Wing
country:DE
phone:44 1383794 50640

Example 2: create bus-contact (frame and frame will be ignored)

subject: create bus-contact [your reference id]

email:gonzo@noaa.biz
individual:Y
frame:gonzo
name:gonzo
name.Mr: Gonzo Name
address:1 Transfer Place
