

Contacts

Modify a contact

Introduction
With this request you can modify person contacts. You can modify 1 contact with one request. Unspecified request fields will be ignored.

ATTENTION

After changing the content of the specified contacts, the whole information is automatically updated.
Keep in mind that you have to provide the numerical suffix of a handle.

- If you want to make an address change within the same record of a domain, you have to send a "notify" (can-domain)"request after changing the content of the specified handle.
- Only contact handles, which are created by the reseller or where the e-mail within the contact is matching the reseller's email-address can be changed.
