

Nameservers

Modify a nameserver

Introduction

modify-ids-ns

Valid values for <id>

- com
- net
- org
- info
- biz
- mobi
- name
- us
- ca
- cn
- ru

With this request you can change the IP-address of a nameserver in the Joker.com database.

ATTENTION:

Only nameservers, which Joker.com is responsible for, will be shown with the IP-address in the whole-output, so only these nameservers could be changed.

If you submit a "modify-ns"-request for a nameserver under a domain, which is not registered with Joker.com or for a nameserver under a country-code-domain, this request will be ignored.

Request fields

mailto:modify-ids-ns [your reference id]

Definition of the request

Parameter	Default value	Required
reference	00000000000000000000000000000000	no
