

Other

wa-email-validate

Triggers a new email verification. In case the original verification email got lost or did not succeed otherwise, this request will send a new email. The original key will be **automatically included**.

This request returns special response header "Result", which will contain "ACK" if the validation request has been sent successfully, or "NACK" otherwise, e.g. if the email address is not in "verification pending" status, or already verified (whois verification, email validation).

For full ICANN policy, please see [Whois-Validation](#).

Requires:

email Email address to send validation request to. This must be domain owner's email address.

Returns:

Result: ACK validation request has been sent
Result: NACK no validation request has been sent for this email
